(54) Title: CURTAIN SUSPENSION DEVICE AND A METHOD OF SUSPENDING CURTAINS

(57) Abstract: A curtain suspension device for hanging curtains flatly (for hanging panel curtains) comprises a main rod (16) arranged to a wall and at least two elongate shorter rods (15) with open hooks (17, 26) at both ends. The short rods are adapted to be hung on the main rod and are adapted to carry a flat hanging curtain each. The brackets for the main rod clamp the rod and leave the upper surface of the rod free as a sliding surface for the hooks so that the hooks can pass the brackets.

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: A47H 1/142, A47H 1/00
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: A47H

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance

B earlier application or patent but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

Z document member of the same patent family
